Framework: DJANGO, FLASK(basic), JAVA(SE,EE)

Frontend: HTML, CSS, JAVASCRIPT

Backend: PYTHON, JAVA, PHP, NODEJS, KOTLIN

DATABASE: MYSQL, NOSQL

VERSIONCONTROL: GITBASH, GITHUB, GITLAB

INTERNSHIP

Web Development Intern | CVThink

(March '24 – April'24)

- Developed a **responsive and interactive showcase website** using HTML, CSS, Bootstrap, and JavaScript, including a modern navigation bar and a visually appealing hero section.
- Implemented a **theme switcher button** and a "Get in Touch" section to enhance user experience and engagement.
- Created a **comprehensive project section** with detailed visuals and a professional footer for navigation and contact information.

ACADEMIC PROJECTS

E-Commerce website(Symbieat)

- Developed a **restaurant website** using HTML, CSS, JavaScript, Bootstrap, Python, AJAX, and Django, featuring a comprehensive online menu and categorized browsing.
- Implemented **user authentication** with login and signup capabilities, along with cart and wishlist functionalities, and integrated a secure payment gateway.
- Created an **admin panel** for managing the menu, viewing cart, wishlist, payment, and order details, enhancing operational efficiency and user experience.

Weather Forecast Dashboard

- Developed a **weather forecast dashboard** using Python and Streamlit, integrating the OpenWeatherMap API for real-time weather updates.
- Enabled users to **enter a city name** and select the number of forecast days, displaying current weather conditions including temperature and sky conditions.
- Created a **user-friendly interface** for easy navigation and quick access to accurate weather data.
